

FilTEq

Filtration Testing Equipment & Services GmbH

Karlsruhe - Germany - office@filteq.de

*FILTER TESTING*DATA ACQUISITION*GAS CLEANING*POWDER HANDLING and DISPERSING*

Mobile Filter Probe - adapted from ISO11057 laboratory test method

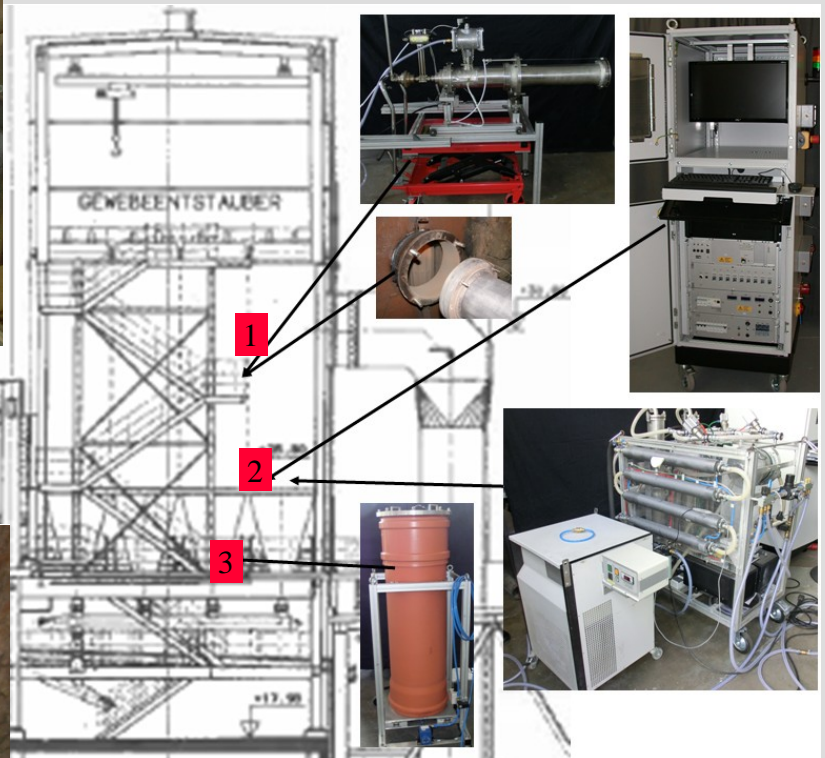

(top) filter probe with heating modules up to 200 °C - (below) filter sample is placed between the filter bags through flange

measuring in the field under "real" conditions to gain "realistic data"

- for the design of filter plants and
- the optimization of the operational conditions

example of testing in an installation for municipal waste incineration (top)

- 1 filter probe on level 25 m (mid section of bags)
- 2 rack with control unit and data acquisition and unit for condensing and adsorption of vapours
- 3 container on balance for condensed humidity
